DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 3, 20, 29/3, 29/20, 30/3, 30/20, 6, 29/6, and 30/6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 7-9 and 12 of U.S. Patent No. 6764044. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present claims are broad enough to cover the invention of the patent 6764044 claims. Also as seen in the 6764044 patent discloses that the fins exert uneven forces in that one may exert a larger force. The present application discloses that the one fin may have a larger area and therefore exert a larger force. As a matter of physics and aerodynamics, a larger fin exerts a larger force in the same air stream. Therefore it would have been obvious to one of ordinary skill in the art to have applied the teachings

of physics and larger fins into the device of the 6764044 for the purpose of allowing for a greater amount of control of the missile or craft which is a goal of the 044 patent.

3. NOTE: it is suggested that the applicant either cancel the claims discussed above or file a terminal disclaimer in the case to obviate this rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
